

DIFFUSIL

(SILICONE RUBBER PRODUCTS FOR WATER TREATMENT)

For Water Industry

- Diffuser Sleeves are high quality silicone membranes suitable for intermittent operations. The membrane developed for industrial waste water treatment plants. Silicone membranes are free of plasticizers and guarantee excellent chemical resistance to biochemical substances in municipal and industrial waste water.
- Our silicone membranes are suitable for application where fouling and chemical oxidation due to solvent exposure, high temperatures occur and specific chemical compatibilities are required. Outperforming others in durability and elasticity making it a very sought-after product.
- We offer membrane sleeves for 63 MM, 90 MM & 115 MM rollers. Membrane Sleeves are Available in four variants.

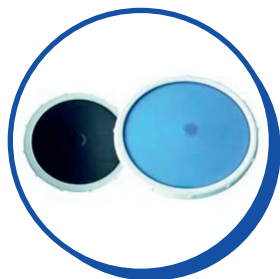

APPLICATIONS

- Municipal wastewater treatment.
- Industrial wastewater treatment.
- Clean water treatment.
- Sludge stabilization.
- Wastewater ozone diffusion.
- Aeration of fish ponds.
- Aeration of streams and lakes

TECHNICAL DATA SHEET

PARAMETERS	UOM	PTDS	TDS 1	TDS 2	TDS 3
HARDNESS	SHORE A	60+/-5	60+/-5	60+/-5	60+/-5
TENSILE	Mpa	10.0	9	8	6.5
ELONGATION	Min %	500	400	350	275
TEAR STRENGTH	kg/cm2	40	36	32	18
DENSITY	kg/cm2	1.15	1.18	1.2	1.2
COLOR		Sky Blue	White	Off White	Dark Blue
SHELF LIFE		Best	Better	Moderate	Lowest

**SILICONE
DISC DIFFUSER**

FEATURES

- High oxygen transfer efficiency.
- High resistance to clogging.
- High resistance to corrosion.
- Wide air flow range.
- Low pressure loss.
- Low energy cost.
- Easy installation.
- Uniform fine bubble.
- Backflow prevention.
- Self cleaning operation.
- Intermittent operation capability.
- Cost saving.

WE OFFER SIZE

5 Inch, 9 Inch & 12 Inch

Certification and Quality

SEVITSIL
SOLUTIONS IN SILICONE
